8. Moments of truth

TASCO Insurance × VETC Motor Insurance Growth Platform · iorta TechNXT · Version 1.0 · October 2026

Evidence base. The personas are **proto-personas**. They are built from the client brief (6 M drivers, 70–80% app use, a price-discount mindset, distrust of sales calls, partner-led sales, near-zero own-channel renewals) and from the behavioural signals the platform actually uses (`src/domain/leads.js#factsFor` : toll trips, long trips, app sessions, wallet balance, auto top-up, consent, complaints). Names, ages and quotes are **illustrative**. Validate them with 8–12 customer interviews per segment and a review of telesales call recordings in Phase 0.

1. Persona index

ID	Persona	Type	Segment (doc 01)	System role (<code>name</code> / <code>email</code>)
PC-1	Private car owner / commuter	Customer	SEG-3 renewal, SEG-4 conquest	<code>customer</code>
PC-2	Long-haul driver	Customer	SEG-3 / SEG-4, roadside-led	<code>customer</code>
PC-3	New car buyer	Customer	SEG-2 new vehicle, SEG-7 partner-led	<code>customer</code>
PC-4	Lapsed owner	Customer	SEG-1 lapsed / uninsured	<code>customer</code>
PC-5	Fleet manager	Customer (B2B)	SEG-6 fleet	<i>(fleet portal planned)</i>
PS-01	Telesales agent	Staff	—	<code>telesales_agent</code>
PS-02	Telesales supervisor	Staff	—	<code>telesales_supervisor</code>
PS-03	Campaign manager	Staff	—	<code>campaign_manager</code>
PS-04	Rule author (product)	Staff	—	<code>rule_author</code>
PS-05	Compliance approver	Staff	—	<code>rule_approver</code> , <code>compliance_officer</code>
PS-06	Data steward	Staff	—	<code>data_steward</code>
PS-07	Claims handler	Staff	—	<code>claims_handler</code>
PS-08	Partner manager	Staff	—	<code>partner_manager</code>
PS-09	Partner staff via API (bank or showroom)	External	SEG-7	<code>partner_api</code>
PS-10	Executive	Staff	—	<code>executive</code>
PS-11	Support engineer	Staff	—	<code>support_engineer</code>

ID	Persona	Type	Segment (doc 01)	System role (rbac.json)
PS-12	Platform admin / security	Staff	—	admin
PS-13	Internal auditor	Staff	—	auditor

2. Customer personas

PC-1 Private car owner / commuter: "Anh Minh", 38, Hà Nội

Dimension	Detail
Vehicle and use	5-seat sedan; commutes and makes weekend trips; about 15–25 toll trips per month
Digital	Opens the VETC app weekly to check balance and top up; uses Zalo daily
Insurance today	Bought TNDS last year from a bank partner bundled with his car loan, or at the inspection centre. Doesn't remember the expiry date or the insurer.
Goals	Stay legal at inspection and roadside checks with zero hassle; spend as little time as possible
Pain points	"Everyone calls me to sell insurance." Doesn't know when it expires. Paper certificates get lost. Believes he should get "% off".
Triggers to act	Inspection booking; wallet top-up; a credible reminder with an exact date
What wins him	One tap from a trusted app, an instant e-certificate, no calls, roadside assistance
Platform signals	appSessions30d medium, tollTrips30d medium, channels.app_push true, consent.marketing true
Typical NBA	verify_expiry (if confidence < 0.5) → digital_reminder

PC-2 Long-haul driver: "Chú Hùng", 51, Thanh Hóa ↔ Hà Nội ↔ Hải Phòng

Dimension	Detail
Vehicle and use	7-seat MPV, often carrying family or passengers; 2,000+ highway km per quarter
Digital	Uses the VETC app for wallet auto top-up; prefers calls to reading
Goals	Help on the road if the car breaks down; passengers protected
Pain points	Breakdowns far from home; unsure what TNDS covers (it does not cover his passengers or his own car)
What wins him	roadside_24_7 (relevance driven by longTripsKm90d, tollTrips30d), upsell_pa_seat (seats ≥ 7), auto_renew (auto top-up)
Platform signals	High longTripsKm90d, autoTopUp true, wallet ≥ premium
Typical NBA	voice_bot if hot with call consent; otherwise digital_reminder

PC-3 New car buyer: "Chị Thảo", 32, TP. Hồ Chí Minh

Dimension	Detail
Moment	Just took delivery; the showroom installed the VETC tag (<code>vetc.tag_activated</code>)
Insurance today	The showroom sold TNDS (and maybe physical damage) at delivery
Goals	Protect a new, expensive car; avoid admin
Pain points	Paperwork overload at delivery; unclear what she has bought and until when
What wins her	Welcome message that stores her cover in the app (<code>new_vehicle_welcome</code>), <code>upsell_motor_pd</code> (vehicle age ≤ 5), inspection reminders
Channel	Showroom via partner API (SEG-7), then VETC app
Typical journey	<code>new_vehicle</code> : welcome +1 day, verify +7 days, value reminder +14 days

PC-4 Lapsed owner: "Anh Tuấn", 45, Bình Dương

Dimension	Detail
Situation	TNDS expired 3 weeks ago. He forgot, or lets it lapse until inspection.
Attitude	Sceptical of calls ("is this a scam?"), price-focused
Risk	Fines at roadside checks; inspection refused; personally liable after an accident
What wins him	A clear, non-pushy service notice (<code>lapsed_notice</code>) with an "if you already bought it, tell us" option; a quick fix in the app; a bot that proves legitimacy (plate-first)
Typical journey	<code>lapsed_uninsured</code> : notice today, bot +2 days (hot/warm), telesales +5 days (hot)
Typical NBA	<code>urgent_recovery</code>

PC-5 Fleet manager: "Ms Lan", 41, logistics SME, 40 vehicles

Dimension	Detail
Situation	Company-owned trucks and vans (<code>ownerType = company</code>), each renewing on different dates
Goals	No vehicle ever off-road for lack of TNDS; one invoice; one contact
Pain points	Spreadsheet tracking; many invoices; individual sales calls to her drivers
What wins her	<code>fleet_dashboard</code> (one view, consolidated VAT invoice), an account manager (<code>route_b2b</code>)
Channel	B2B team; partner type <code>fleet</code>
Note	Must be excluded from B2C robocalls (the campaign route already skips <code>company</code> ; journeys do not yet, see doc 05 E-07)

3. Staff and partner personas

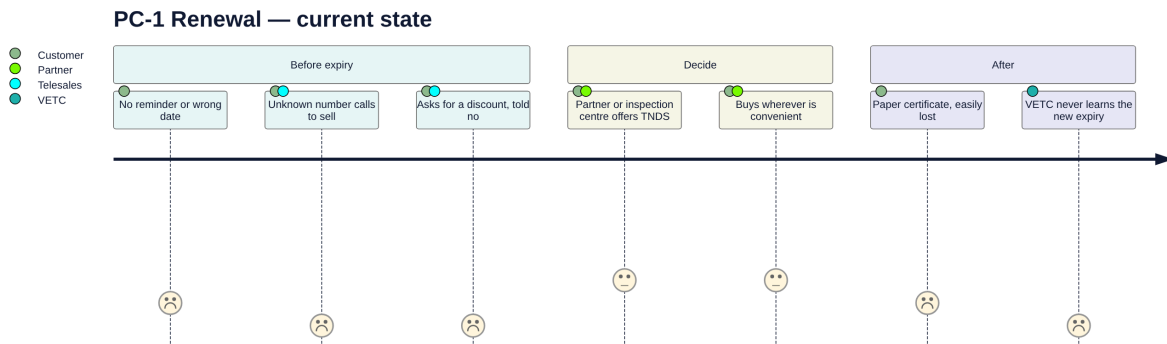

ID	Persona	Goals	Key pains today	Platform jobs-to-be-done	Primary screens / APIs	Success measure
P S-01	Telesales agent	Close more with fewer calls	Cold lists; customers distrust calls; can't take payment	See hot, verified, interested customers with talking points; send a one-tap link while on the call	Telesales inbox (/api/handoffs), Customer 360	Handoff win rate (K-08); first contact ≤ 2 business hours
P S-02	Telesales supervisor	Team productivity and compliance	No visibility of lead quality or script adherence	Assign handoffs; rehearse bot scripts; monitor outcomes	Telesales inbox (assign), Voice bot console	Win rate; SLA adherence
P S-03	Campaign manager	Grow policies at a controlled cost	No reliable expiry data; blunt campaigns	Prioritised queue, journeys, bot campaigns, event simulator, economics	Leads, Journeys, Voice campaign, Home dashboard	K-00, K-10
P S-04	Rule author (product)	Change scoring, journeys and copy fast and safely	IT tickets for every change	Draft, validate, simulate, submit	Rules studio (/api/rules*)	Rule-change lead time ≤ 1 day
P S-05	Compliance approver	Nothing unlawful reaches customers	Manual copy review; opaque bots	Four-eyes approval; copy guard; governance KPIs; DSAR	Rules studio (approve), Audit, governance dashboard	0 copy-guard breaches; 0 contact-policy breaches
P S-06	Data steward	Trustworthy customer data	Duplicates; 1 in 10 records verified	Ingest; DQ queue; lineage; corrections with evidence	Data quality (/api/dq/*), Customer 360 lineage	K-01 usable-expiry rate
P S-07	Claims handler	Fast, transparent FNOL	Late, incomplete notifications	FNOL queue and status transitions within SLA	Claims queue (/api/claims)	% acknowledged within 4 h
P S-08	Partner manager	Grow partner sales; settle commission cleanly	Manual statements; disputes	Onboard, keys, suspend, statements	Partners (/api/partners*)	Active partners on API; disputes = 0
P S-09	Partner staff via API (bank loan officer, showroom sales)	Close insurance with the main sale	Re-keying data; slow issuance	Quote by plate, bind, instant e-certificate, statement	Partner API (/api/partner/v1/*)	Time to certificate < 1 min
P S-10	Executive	Growth and ROI visibility	Anecdotal reporting	Growth, channel, economics, adoption	Home dashboard (/api/dashboard/*)	K-00, premium, cost per policy
P S-11	Support engineer	Stable platform	Silent integration failures	Integration status, jobs, reconciliation	Operations (/api/ops/*), /metrics	SLOs (doc 03)

ID	Persona	Goals	Key pains today	Platform jobs-to-be-done	Primary screens / APIs	Success measure
P-S-12	Platform admin / security	Least-privilege access	Shared accounts	Users, roles, regions, MFA	Users (/api/users)	0 orphan accounts; MFA coverage of privileged roles = 100%
P-S-13	Internal auditor	Evidence on demand	Logs scattered, editable	Audit search; hash-chain verification	Audit (/api/audit*)	Chain verifies daily

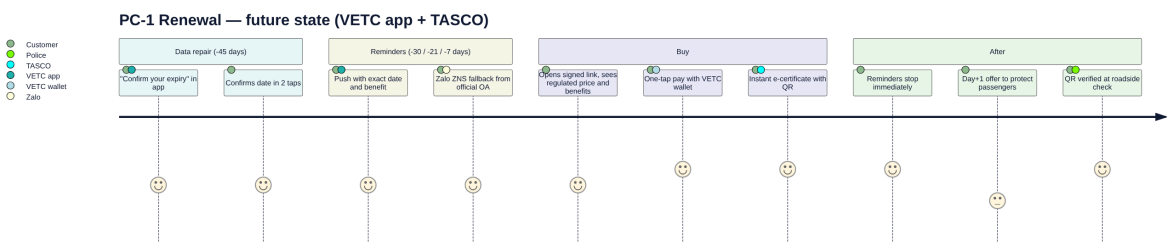

4. Journey maps: current state vs future state

Scores in the journey diagrams are customer sentiment from 1 (very negative) to 5 (very positive). They are **design hypotheses** to validate in research.

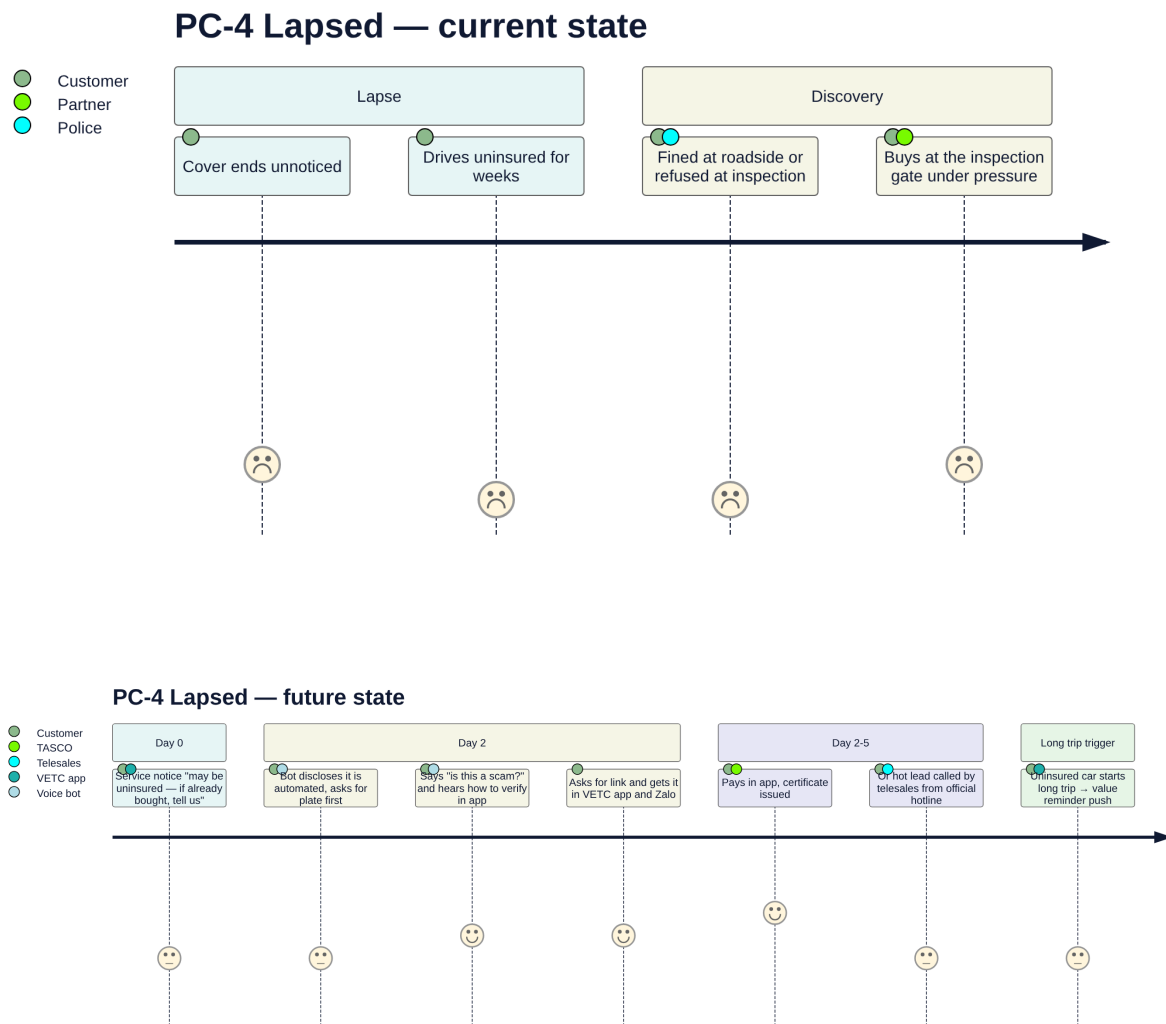

4.1 PC-1 renewal: current state

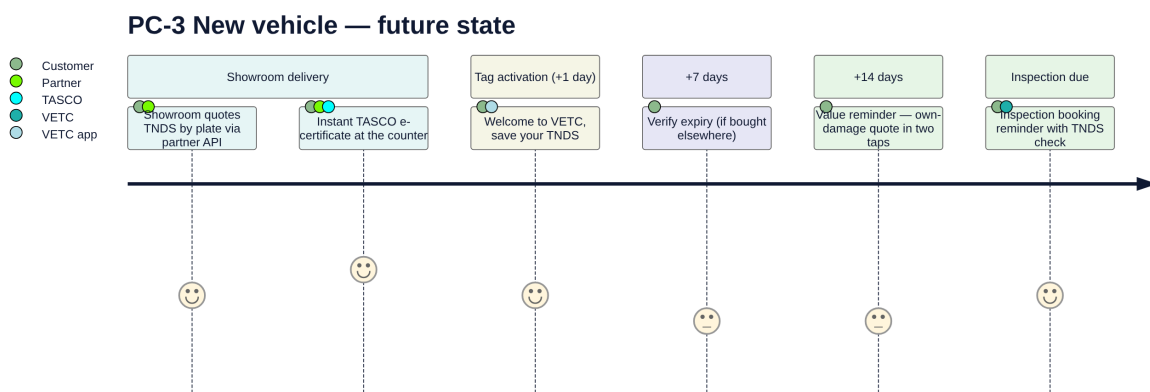

4.2 PC-1 renewal: future state

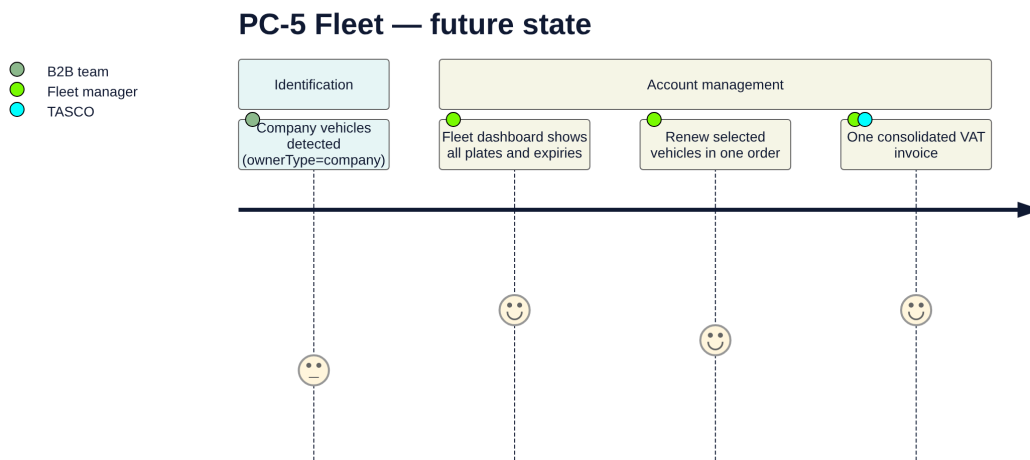

4.3 PC-4 lapsed recovery: current vs future

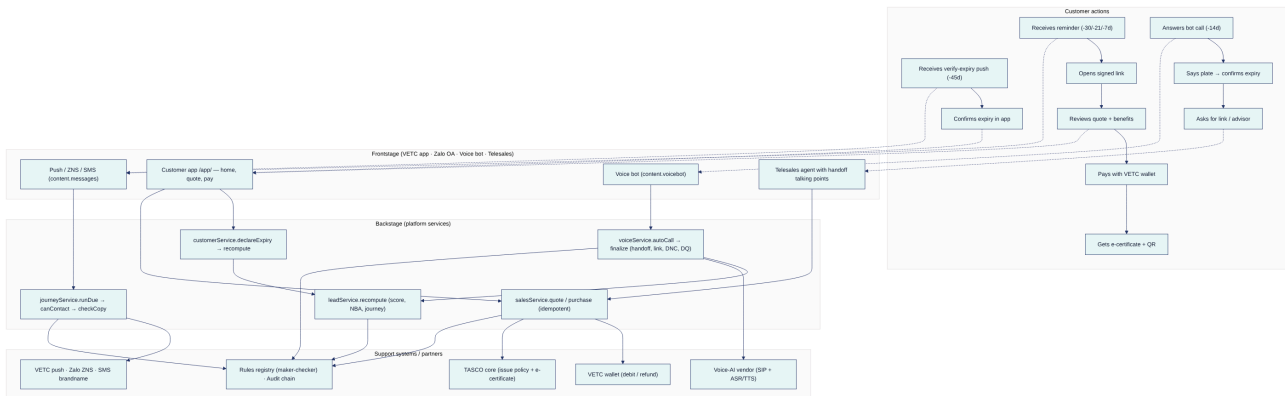

4.4 PC-3 new vehicle: future state

4.5 PC-5 fleet: future state

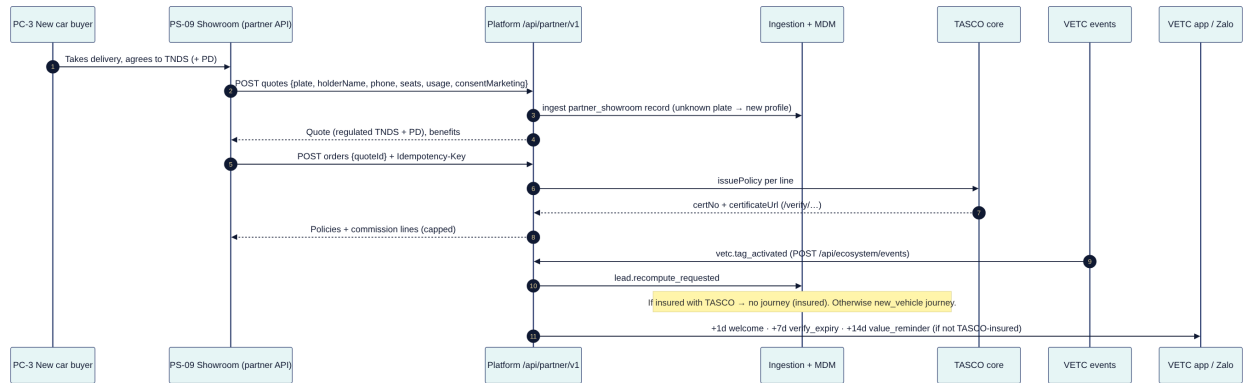

5. Service blueprint: renewal (SEG-3) and conquest (SEG-4)

Stage	Customer action	Frontstage	Backstage	Support system	Fail point → mitigation
Data repair (-45 days)	Confirms expiry	Push / Zalo verify_expiry	declareExpiry → recompute	Rules: nba.fix_data	Customer ignores it → inference from inspection cycle and tag anniversary; bot asks "which month?"
Reminders (-30 / -21 / -7 days)	Reads and opens link	first_reminder / conquest_reminder, value_reminder, urgent_reminder	runDue → canContact → checkCopy → send	Push, ZNS, SMS	Cap or hours reached → skipped with reason; next step continues
Bot (-14 days, hot/warm for renewal, hot for conquest)	Verifies plate	Voice bot	autoCall → finalize	Voice vendor	ASR fails → 3 attempts → unverified; scam concern → trust line
Telesales (-3 days, hot)	Talks to advisor	Agent	Handoff queue	—	No payment on the call → link sent

Stage	Customer action	Frontstage	Backstage	Support system	Fail point → mitigation
Purchase	Pays	Customer app	quote → purchase	Wallet, TASCO core	Wallet timeout → circuit breaker; issuance failure → refund
After sale	Gets certificate	purchase_confirmation	policy.issued → stop journeys, cross-sell	QR verify page	—

6. Service blueprint: new-vehicle onboarding (SEG-2 and SEG-7)

Stage	Frontstage	Backstage	Rule kinds	KPI
Showroom quote	Partner front end	POST /api/partner/v1/quotes → ingestion	products, tariff.*, rating.motor_pd, enrichment	Quote → bind conversion
Bind	Partner front end	POST /api/partner/v1/orders	commission	Time to certificate
Tag activation	—	handleEcosystemEvent → recompute	triggers, journeys	New-vehicle enrolment rate
Onboarding messages	VETC app, Zalo	runDue	content.messages, contact_policy	K-07
Cross-sell	VETC app	cross_sell touchpoint	journeys.crossSell, benefits	K-09

7. Pain points → design responses

PP ID	Pain point	Persona	Design response	FR	Evidence
PP-01	"I don't know when my insurance expires."	PC-1, PC-4	Expiry inference with confidence; app confirmation; exact date in every reminder	FR-005, FR-076, FR-025	enrichment.json, /api/customer/expiry
PP-02	"Unknown callers try to sell me things; might be a scam."	PC-1, PC-4	Bot disclosure, plate-first verification, trust script, official hotline, no payment on calls	FR-031 – FR-035, FR-040	content.voicebot.json

PP ID	Pain point	Persona	Design response	FR	Evidence
PP-03	"I want a discount."	PC-1, PC-4	Honest regulated-price answer plus relevant service value; copy guard	FR-035, FR-058, FR-024	benefits.json , copy_guard.json
PP-04	"Buying is faster at the partner."	PC-1, PC-3	One-tap wallet purchase; partner API so partners sell TASCO instantly	FR-077, FR-065	/api/customer/orders , /api/partner/v1/*
PP-05	"I lose paper certificates; police doubt screenshots."	PC-1	E-certificate with public QR verification	FR-050	/verify/:certNo
PP-06	"Too many messages."	All	Caps (1/day, 3/week), hours 08–20, consent centre, journeys stop on purchase	FR-023, FR-078, FR-019	contact_policy.json
PP-07	"TNDs doesn't cover my passengers or my car — I didn't know."	PC-2, PC-3	Explained cover upgrades and bundles	FR-055, FR-054, FR-028	upsell_pa_seat , upsell_motor_pd
PP-08	"My drivers get sales calls; I manage 40 renewals in Excel."	PC-5	B2B routing; fleet dashboard (planned)	FR-070	nba.fleet
PP-09	Agent: "My leads are cold and I can't close on the phone."	PS-01	Hot, plate-verified handoffs with talking points; link-based closing	FR-040 – FR-042	handoffSummary
PP-10	Product: "Every change needs IT."	PS-04	Rules studio with simulation and maker-checker	FR-082 – FR-087	/api/rules*
PP-11	Compliance: "I can't review every script and message."	PS-05	Copy guard at save and send; versioned scripts; audit chain	FR-024, FR-086, FR-099	validators.js , auditChain.js
PP-12	Data: "Only 1 in 10 records is verified."	PS-06	MDM, DQ queue, lineage, data-repair loop	FR-004 – FR-010	enrichment.js
PP-13	Partner: "Commission statements are late and disputed."	PS-08, PS-09	Self-service statement, rules-based capped commission	FR-067 – FR-069	commission.json
PP-14	Claims: "Accidents reported late with poor information."	PS-07, PC-1	In-app FNOL with location, photos and a 4 h SLA	FR-071, FR-072	claimsService.js

8. Moments of truth

MoT ID	Moment	Who	Why it matters	Platform response	Trigger / rule
MoT-01	First 10 seconds of a call	PC-1, PC-4	Decides trust or hang-up	Automated-assistant disclosure; "never OTP or payment"; ask for the plate, never say it	content.voicebot.lines.intro
MoT-02	Price question	PC-1, PC-4	Where discount expectations meet the law	Truthful regulated-price answer plus value pivot	Line price ; copy_guard

MoT ID	Moment	Who	Why it matters	Platform response	Trigger / rule
MoT-03	Tag activation (new car)	PC-3	Habit forms in the first weeks	Welcome, then save cover, then reminders	<code>triggers.tag_activated → new_vehicle</code>
MoT-04	Inspection booking	PC-1, PC-4	Valid TNDs is required at inspection	TNDs check message	<code>triggers.inspection_booked</code>
MoT-05	Wallet top-up	PC-1, PC-2	In the app, with funds	One-tap reminder push	<code>triggers.wallet_topup</code>
MoT-06	Starting a long trip uninsured	PC-2, PC-4	Risk is salient	Value reminder push	<code>triggers.long_trip</code>
MoT-07	Expiry day	All	Legal exposure begins	Service notice that bypasses caps	<code>journeys.renewal_step expiry_day</code>
MoT-08	Payment tap	All	A double charge or failure destroys trust	Idempotent purchase; automatic refund on issuance failure	FR-047, FR-048
MoT-09	Roadside or inspection check	All	Proof of cover	QR verification page	FR-050
MoT-10	Accident	All	The moment that justifies insurance	In-app FNOL; 4 h acknowledgement SLA	FR-071
MoT-11	Saying "stop"	All	Respect builds long-term trust	Immediate DNC; audited	FR-036, FR-078
