

Change Management and Training Plan

TASCO Insurance × VETC Growth Platform — Delivery & Change

iorta TechNXT

Version 1.0 · 07 October 2026

Contents

1. Change impact assessment
2. Communications plan
3. Champions network
4. Training framework
5. Adoption KPIs
6. Resistance management
7. Reinforcement plan

This plan is about getting **people** to work in a new way. Telesales agents work from a prioritised inbox with explained scores. Marketing runs governed journeys instead of blasts. Compliance approves rules in a studio instead of reviewing spreadsheets. Customers renew in three taps in the VETC app. Without this change the technology does not move renewals.

Approach: **ADKAR** (Awareness, Desire, Knowledge, Ability, Reinforcement) applied per stakeholder group, delivered through a champions network and role-based training in a safe sandbox.

1. Change impact assessment

Impact: **H** = high (new way of working, new tool, new KPIs) · **M** = medium · **L** = low.

Stakeholder group	Today	Future (with platform)	Impact	Key concerns we expect	Roles in the platform
Telesales agents (VETC call centre / TASCO)	Cold-call lists, little context, customers suspect scams, no visibility of expiry reliability	Warm handoffs from the voice bot with verified plate, talking points and benefits. Inbox with claim/callback/won/lost. Regional data only. Send one-tap link instead of taking payment by phone.	H	"Will the bot replace me?" "More clicks?" "Will my commission be tracked?"	telesales_agent
Telesales supervisors	Manual allocation, spreadsheets	Queue oversight, assignment (handoff: assign), dashboards, SLA tracking	H	Loss of control, new KPIs	telesales_supervisor
Campaign / marketing managers	Mass SMS, no frequency control	Journeys with contact policy, triggers, voice campaigns, dashboards. Copy guard blocks discount wording.	H	"Rules restrict creativity", ZNS approval lead times	campaign_manager
Product and pricing (rule authors)	Requests to IT for changes	Draft, validate and simulate rule sets themselves	M	Fear of breaking production	rule_author
Compliance / legal (approvers)	After-the-fact review	Pre-approval (maker-checker), audit search, DSAR, governance dashboard	M	Workload, accountability	rule_approver, compliance_officer
Data stewards	No defined role	DQ queue, expiry corrections with evidence, ingestion, lineage	H (new role)	Volume of issues	data_steward
Claims handlers	Phone/paper FNOL	Digital FNOL queue with a 4-hour acknowledgement SLA	M	SLA pressure	claims_handler
Partner managers	Email/Excel commission	Partner onboarding, API keys, commission statements	M	Partner pushback	partner_manager
Partners (banks, showrooms, agents, fleets, inspection centres)	Own systems, manual submission	API integration, instant quote and issue, transparent statements	M	Channel conflict, IT effort	API key (partner_api)
IT / support	n/a	Operate the platform, jobs, integrations; MFA administration	M	New stack, on-call	admin, support_engineer

Stakeholder group	Today	Future (with platform)	Impact	Key concerns we expect	Roles in the platform
Executives	Monthly manual reports	Live dashboards	L	Data trust	executive
Internal audit	Sample-based evidence	Read-only audit trail with hash-chain verification	L		auditor
Customers (VETC drivers)	Renew with whoever calls, no reminder, paper certificate	Reminders in app/Zalo, ≤ 3-tap renewal with wallet, instant e-certificate with QR, benefits, consent centre, FNOL in app	M	Trust, privacy, "is this a scam?"	Customer app

Readiness heat map (to be refreshed at G1 and G3)

Group	Awareness	Desire	Knowledge	Ability	Reinforcement
Telesales agents	Low	Low	Low	Low	—
Supervisors	Medium	Medium	Low	Low	—
Campaign managers	Medium	High	Low	Low	—
Compliance	Medium	Medium	Low	Low	—
Data stewards	Low	Medium	Low	Low	—

2. Communications plan

#	When	Audience	Message	Channel	Sender	Owner
C 1	Kick-off (wk 0)	All internal stakeholders	Why: renewal problem, trust problem, regulated pricing. What changes and what does not.	Town hall + email	TASCO CEO + VETC CEO	T-BUS
C 2	Discovery (wk 1–2)	Telesales, supervisors	"We are designing this with you" — invitation to interviews and usability tests	Team briefings	Call-centre manager	V-CC
C 3	End of each sprint	Champions, managers	Demo recording and "what's new" one-pager	Teams/Zalo group + intranet	Product Owner	T-PRD
C 4	G2 (build complete)	All user groups	Training schedule, sandbox access, "your role in the platform"	Email + LMS enrolment	Change Lead	WS9
C 5	G3 (~2 weeks)	Telesales	"Day in the life" video. The bot does the verification; you do the conversation. Commission continuity.	Video + huddles	Supervisor + champion	V-CC
C 6	G3 (~1 week)	Compliance, marketing	Rules studio and copy guard: what is blocked and why	Workshop	Compliance Head	T-CMP
C 7	Pilot launch	Pilot users	Go-live guide, war-room contacts, help drawer, FAQ	Email + desk drops	Product Owner	T-PRD
C 8	Pilot launch	Customers (pilot cohort)	New: renew in the VETC app, e-certificate with QR, VETC never asks for OTP	In-app banner, Zalo OA post	VETC Marketing	V-PRD
C 9	Weekly during pilot	Pilot users, management	Wins, tips, KPI snapshot, fixes shipped	Newsletter	Change Lead	WS9

#	When	Audience	Message	Channel	Sender	Owner
C 10	Partner onboarding	Partners	Commercial model, API guide, sandbox key	Partner pack + webinar	Partner Manager	T-PRD
C 11	Pilot end (G4)	All	Results and next waves	Town hall	T-BUS	T-BUS
C 12	Each wave	New users and regions	Wave-specific onboarding	As C4–C7	Change Lead	WS9

Key messages (agreed with Compliance):

1. "TNDS premiums are set by regulation and are the same everywhere. We win on service, not price." We never mention discounts.
2. "VETC never asks for OTPs or payment over the phone. Payment only happens inside the official VETC app."
3. "The voice bot handles verification and reminders. People handle conversations and advice."
4. "Every change to customer-facing rules is approved by a second person and recorded."

3. Champions network

Item	Design
Size	1 champion per 10 users: about 2–3 per telesales squad, 1 in marketing, 1 in compliance, 1 in data, 1 in claims
Selection	Respected practitioners nominated by managers, volunteers preferred
Time	10 % of their time during pilot, 5 % in BAU
Role	Early access (sandbox from Sprint 2), test in usability sessions, first-line "how do I...?" help, collect feedback, co-deliver training
Enablement	Champion bootcamp (1 day), direct channel to the product team, release previews
Recognition	Certificate, visibility at town halls, input to performance reviews
Rituals	Fortnightly champion forum. Feedback is logged in the backlog with a "champion" label.

4. Training framework

4.1 Principles

- **Role-based:** each user learns only the pages their permissions show (the navigation is filtered by permission).
- **Practice first:** every module ends with hands-on tasks in the **SANDBOX environment in demo mode**, with synthetic data and seeded demo users (see section 4.4).
- **Vietnamese-first:** all material in Vietnamese, with English versions for regional and vendor staff.
- **Short and mobile-friendly:** LMS micro-modules of 10–20 minutes, plus a 2–3 hour classroom or virtual lab per role.
- **Documentation-backed:** the persona manuals in [docs/manuals/](#) are the reference material, and the in-app help drawer ("?") links to the relevant sections.

4.2 Curricula by role

Role	LMS modules (self-paced)	Instructor-led lab	Total	Reference manual
All staff (core)	M0 Platform tour, sign-in and MFA, navigation, help, language/theme (15 min); M1 Privacy and PII masking basics (15 min); M2 Regulated pricing and no-discount rule (10 min)	—	40 min	user-manual.md
Telesales agent	T1 Reading a handoff and talking points (15); T2 Customer 360 and explainable score (15); T3 Quote, send link, issue (20); T4 Trust script and objection handling (20); T5 Outcomes: won/lost/callback (10)	3 h lab, role-play with voice bot transcripts	4.5 h	manual-telesales-agent.md
Telesales supervisor	Agent modules + S1 Queue management and assignment (15); S2 KPIs and coaching (15)	2 h	4 h	manual-telesales-supervisor.md
Campaign manager	CM1 Leads and tiers (15); CM2 Journeys and contact policy (20); CM3 Triggers and ecosystem events (15); CM4 Voice campaigns (15); CM5 Dashboards (15)	3 h	4.5 h	manual-campaign-manager.md
Rule author	R1 Rule kinds and JSON Logic basics (20); R2 Drafting and validation (20); R3 Simulation (15); R4 Rollback (10)	3 h	4 h	manual-rule-author-and-approver.md
Rule approver / compliance	R1, R3 + C1 Reviewing a change (15); C2 Audit search and chain verification (15); C3 DSAR (15); C4 Governance dashboard (10)	2 h	3.5 h	manual-rule-author-and-approver.md , manual-compliance-officer.md
Data steward	D1 DQ issues (15); D2 Expiry correction with evidence (15); D3 Ingestion and lineage (20)	2 h	3 h	manual-data-steward.md
Claims handler	CL1 FNOL queue and SLA (15); CL2 Status transitions (10)	1 h	1.5 h	manual-claims-handler.md
Partner manager	P1 Onboarding and keys (15); P2 Statements (10); P3 Supporting partner developers (15)	1.5 h	2.25 h	manual-partner-manager.md , partner-api-guide.md
Admin / support	A1 Users and roles (15); A2 Operations status and jobs (20); A3 Health and incidents (20)	3 h incl. runbook drills	4 h	manual-administrator-and-support.md
Executive	E1 Reading the dashboard (10)	30 min briefing	40 min	manual-executive.md
Partner developers	API guide + sandbox key	1 h webinar	2 h	partner-api-guide.md

4.3 Training timeline

When	Activity
Sprint 2–3	Champion bootcamp, sandbox access for champions
Sprint 4	Train-the-trainer (champions + supervisors)
UAT (T2–T3)	Pilot users trained (role curricula). UAT doubles as practice.
Pilot weeks 1–2	Floor-walkers (champions + iorta BA) in each telesales room, daily 15-minute tips huddle

When	Activity
Each scale-out wave	Same pattern for new users, delivered by champions
BAU	New-joiner path in the LMS. Refresher on each major release ("what's new" micro-module).

4.4 Sandbox practice (demo mode)

The SANDBOX/TRAINING environment runs with `DEMO_MODE=true`, synthetic VETC data (2,500 vehicles by default, `SEED_RECORDS`) and the seeded users below. The demo password is `Tasco@Demo2026!`. It is **sandbox only, never used in production**.

Username	Role	MFA	Practice tasks
<code>agent.hn</code> / <code>agent.hcm</code>	Telesales agent (Hà Nội / TP.HCM)	No	Claim a handoff, open Customer 360, quote TNDS + PA, send link / issue, record outcome
<code>supervisor</code>	Telesales supervisor	No	Reassign a handoff, review queue KPIs
<code>campaign</code>	Campaign manager	No	Filter hot leads, run due journeys, inject an ecosystem event, run a voice campaign
<code>author</code>	Rule author	No	Draft a scoring change, simulate, submit
<code>approver</code>	Rule approver	Yes	Approve or reject the author's draft
<code>compliance</code>	Compliance officer	Yes	Audit search, verify chain, DSAR export
<code>steward</code>	Data steward	Yes	Resolve DQ issues, correct an expiry with evidence
<code>claims</code>	Claims handler	No	Move a claim from submitted to acknowledged
<code>partners</code>	Partner manager	No	Onboard a partner, issue a key, view statement
<code>admin</code>	Platform admin	Yes	Create a user, check ops status, run reconciliation
<code>support</code>	Support engineer	No	Run relay job, check job history
<code>exec</code>	Executive	No	Read the overview dashboard
<code>auditor</code>	Internal auditor	No	Search audit trail

MFA codes in the sandbox are shown by the demo helper (`GET /api/demo/totp/<username>`), which is disabled outside demo mode. In training, the sign-in screen's demo helper shows the current code. **Production uses a real authenticator app.**

Customer-app practice: open `/app/` and use the demo picker to choose a synthetic vehicle. Confirm the expiry date, renew with an add-on, verify the certificate at `/verify/<certNo>`, change consent and report an accident.

The sandbox is reset nightly (`npm run seed` on an empty store), so trainees can practise freely.

4.5 Certification

Level	Criteria	Grants
Certified user	LMS modules complete. Practical assessment in the sandbox (role task list, ≥ 80 % tasks correct, observed by a champion or trainer).	Production account activated by the admin (role assigned)
Certified approver	Certified user + approver module + a supervised approval of a real low-risk rule change	<code>rule_approver</code> role in production

Level	Criteria	Grants
Champion	Certified user + bootcamp + 2 co-delivered sessions	Champion badge

Production accounts for regulated roles (approver, compliance, steward, admin) are created **only after certification**. This forms part of the access-provisioning evidence.

5. Adoption KPIs

All targets are **proposed** for agreement at G1/G3. Sources: platform endpoints (`/api/dashboard/adoption` , `/api/dashboard/overview` , `/api/dashboard/governance`), audit trail, LMS and surveys. Four targets are already encoded as reference values in `insightsService.adoption()` : weekly active telesales $\geq 90\%$, average clicks to renew ≤ 3 , handoff first contact within 2 business hours, rule-change lead time ≤ 1 day.

KPI	Definition	Source	Pilot target (proposed)	Scale target (proposed)
Weekly active users — telesales	Distinct agents with ≥ 1 login and ≥ 1 handoff action per week $\div$ licensed agents	Audit (<code>auth.login</code> , <code>handoff.updated</code>)	$\geq 90\%$	$\geq 95\%$
Weekly active users — supervisors, campaign, compliance, stewards	Per role, ≥ 1 meaningful action per week	Audit	$\geq 80\%$	$\geq 90\%$
Handoff first-contact time	Median time from <code>handoff.created</code> to first <code>handoff.updated</code> by an agent, in business hours	Audit / events	≤ 2 business hours	≤ 1 business hour
Handoff backlog age	% of open handoffs older than 1 business day	Handoffs	$\leq 10\%$	$\leq 5\%$
% renewals via app	Completed orders with channel <code>vetc_app / zalo</code> $\div$ all completed renewal orders	<code>sales.byChannel</code>	$\geq 50\%$	$\geq 65\%$
Clicks/taps to renew	Median taps from opening a renewal link to the e-certificate	Front-end analytics	≤ 3	≤ 3
Customer expiry confirmations	Customers confirming expiry in app $\div$ <code>verify_expiry</code> messages sent	Audit (<code>customer.expiry_declared</code>)	$\geq 15\%$	$\geq 25\%$
Rule-change lead time	Median time from <code>rules.draft_created</code> to <code>rules.approved</code>	Audit	≤ 1 business day	≤ 1 business day
Rule rejection rate	Rejected $\div$ submitted	Audit	Track (no target)	$\leq 20\%$
Voice bot opt-out rate	<code>opted_out</code> $\div$ calls	Governance dashboard	$\leq 5\%$	$\leq 3\%$
Plate-verification failure rate	(<code>plate_mismatch</code> + <code>unverified</code>) $\div$ calls	Governance dashboard	$\leq 15\%$	$\leq 10\%$
Customer CSAT (post-purchase)	1–5 rating after e-certificate	In-app survey	≥ 4.3	≥ 4.5

KPI	Definition	Source	Pilot target (proposed)	Scale target (proposed)
Customer NPS	Quarterly survey of pilot customers	Survey	≥ +30	≥ +40
Staff satisfaction / SUS	System Usability Scale per role	Survey (see usability plan)	≥ 70	≥ 75
Training completion	Certified users ÷ target users before account activation	LMS	100 % before go-live	100 %
Help usage	Help-drawer opens per active user per week (should fall over time)	Front-end analytics	Track trend	Falling
Support tickets per 100 users	"How-to" tickets	Service desk	≤ 10 / week	≤ 3 / week

6. Resistance management

Likely resistance	Signal	Response
Agents bypass the inbox and work old lists	Low handoff.updated per agent; wins not recorded	Supervisor coaching; legacy lists retired by date; incentives based on platform-recorded wins
"The bot steals my leads"	Champion feedback	Show that the bot does verification and reminders and hands hot leads to agents; share agent conversion uplift
Marketing frustrated by caps and the copy guard	Rejected drafts, escalations	Explain the regulatory basis (Decree 91/2020, Law 08/2022); co-create value-based copy; Rules clinic
Compliance overloaded with approvals	Rule lead time > 1 day	Batch low-risk changes; add a second approver; agree risk tiers
Partners fear channel conflict	Partner churn	Partner council, rules of engagement, transparent statements

7. Reinforcement plan

1. **Measure:** weekly adoption dashboard reviewed by supervisors and the Product Owner, with role-level KPIs (section 5).
2. **Recognise:** monthly "renewal hero" recognition for agents and squads, based on wins recorded in the platform.
3. **Coach:** supervisors review a sample of handoffs weekly (talking points used? link sent? outcome recorded?).
4. **Embed:** platform KPIs added to role scorecards and performance objectives (handoff SLA, rule lead time, DQ backlog).
5. **Retire the old way:** legacy call lists and email-based rule approvals are switched off by a set date after pilot.
6. **Refresh:** "what's new" micro-module and a champion forum with each release. Annual refresher for regulated roles (approvers, compliance, stewards).
7. **Listen:** in-app feedback link in the help drawer; quarterly pulse survey; issues tracked to closure and reported back ("you said, we did").
8. **Audit:** quarterly access review confirms that people hold only the roles they need, and that certified approvers remain certified.
