RACI maintenance

R = Responsible (does the work) · **A** = Accountable (owns the outcome, signs off; **exactly one per activity**) · **C** = Consulted (two-way, before the decision) · **I** = Informed (one-way, after the decision). A blank cell means no involvement.

Parties and abbreviations

Org	Code	Party
TASCO Insurance	T-BUS	Business owner (sponsor, motor line head)
	T-PRD	Product owner / product team
	T-CMP	Compliance and Legal (incl. DPO)
	T-IT	IT (core systems, infrastructure, service management)
	T-SEC	Information security (CISO office)
	T-DAT	Data owner / data stewards
VETC	V-PRD	Product
	V-APP	Mobile app team
	V-DAT	Data team
	V-CC	Call centre / telesales (managers, supervisors, agents)
iorta TechNXT	I-DL	Delivery lead
	I-AR	Solution architect
	I-EN	Engineers (backend, frontend, data, integration)
	I-QA	QA / test
	I-DSO	DevSecOps
	I-BA	Business analyst
	I-UX	UX/UI designer
Vendors	X-VAI	Voice-AI / telephony vendor
	X-ZAL	Zalo (OA / ZNS, VNG)
	X-SMS	SMS brandname aggregator
Partners	P	Distribution partners (banks, showrooms, agents, fleets, inspection centres)

Notes on Part B:

- **B12:** T-CMP is accountable for producing the evidence. Internal Audit (outside this matrix) consumes it through the `auditor` role.
- **B16:** the accountable party is the TASCO Claims Lead (a product/business function, shown under T-PRD). The `claims_handler` role carries out the work (R).
- **B15:** telesales operations are accountable and responsible within VETC's call centre, assuming VETC runs the telesales squads as agreed in Discovery. If TASCO runs telesales, A moves to T-PRD.

Key separation-of-duties rules reflected above

1. **The maker cannot be the checker.** The rules service rejects approval or rejection by the draft's author (`Maker-checker: you cannot approve your own change`). Authors (`rule_author`) cannot approve, and approvers (`rule_approver` , `compliance_officer`) should not author.

2. **The platform administrator cannot author or approve rules or see customer PII.** The `admin` role has `users:manage`, `ops:*`, `audit:read`, `rules:read` and `dashboard:read` only.
3. **Support engineers run jobs but cannot see dashboards, customers or rules** (`support_engineer`: `ops:read`, `ops:run_jobs`).
4. **Auditors are read-only** (`audit:read`, `rules:read`, `dashboard:read`).
5. **DSAR erasure** is limited to `compliance_officer` (`dsar:manage`). It is refused while a policy is active, because of the legal retention obligation.
6. **RBAC changes** are code plus CAB, never a runtime toggle.

RACI maintenance

The Delivery Lead owns this document until BAU handover, and the TASCO IT Service Manager owns it afterwards. It is reviewed at every stage gate and whenever an organisation or role changes.
