

Quality Engineering — TASCO Growth Platform

TASCO Insurance × VETC Growth Platform — Quality Engineering

iorta TechNXT

Version 1.0 · 07 October 2026

Quality engineering documentation for the TASCO Insurance × VETC motor insurance growth platform (built by iorta TechNXT).

Document	Purpose	Primary audience
test-strategy.md	Scope, test levels and types (unit, integration, API/contract, SIT, UAT, NFT, security, resilience, DR, accessibility, localisation, compliance, data quality, migration), automation and CI gates, environments, test data, entry/exit criteria, defect severity, metrics, roles. Appendix A is the known-issues register (KI-01 – KI-33) found during code review	QA, engineering, TASCO IT, SteerCo
test-case-catalogue.md	164 test cases (TC-001 – TC-164) by module, with objective, preconditions, steps, expected result, type, priority and automation file	QA, developers, testers
performance-and-capacity-test-plan.md	Workload model for a 6 M-vehicle base, scenarios PERF-S1 – S13, SLO targets, tooling (<code>npm run test:perf</code>), environment sizing, pass/fail criteria, capacity model	Perf engineer, SRE, TASCO infrastructure
uat-plan.md	UAT approach, 46 business scenarios by persona, reference data, entry/exit criteria, triage, sign-off sheet, schedule (11–22 Jan 2027)	TASCO business, VETC CX, Compliance

Quick reference — test commands

Command	What it runs
<code>npm run lint</code>	ESLint over the repository
<code>npm test</code>	Unit + integration + API suites (<code>test/unit</code> , <code>test/integration</code> , <code>test/api</code>) with the spec reporter
<code>npm run test:unit</code> / <code>npm run test:api</code>	One layer only
<code>npm run test:coverage</code>	Same suites with the coverage gate: lines ≥ 80 %, functions ≥ 80 %, branches ≥ 70 %
<code>npm run test:security</code>	Abuse-case suite (<code>test/security</code>)
<code>npm run test:pg</code>	Postgres adapter, migrations, SQL injection, audit chain (<code>test/pg</code> ; needs <code>TEST_DATABASE_URL</code> , default <code>postgres://postgres:postgres@localhost:5432/tasco_test</code>)
<code>npm run test:perf</code>	HTTP load generator (<code>test/perf/load.js</code>) reporting p50/p95/p99 and RPS
<code>npm run audit</code>	<code>npm audit --omit=dev --audit-level=high</code>

ID conventions used across quality and operations documents

Prefix	Meaning	Defined in
TC-nnn	Test case	Test case catalogue
KI-nn	Known issue from code review	Test strategy, Appendix A
PERF-Sn	Performance scenario	Performance plan
UAT-XX-nn	UAT business scenario	UAT plan
RB-nn	Runbook incident procedure	Runbook

Prefix	Meaning	Defined in
SOP-nn	Standard operating procedure	Runbook
ALR-nn	Alert rule	Monitoring and alerting
PRC-xxx-nn	Production readiness check	Readiness checklist
DR-Tn	DR test	DR and BCP
