TASCO Insurance × VETC Motor Insurance Growth Platform · prepared by iorta TechNXT for TASCO Insurance

This folder holds the business case, requirements and engagement model for the platform: new business, renewal, partners and value beyond discount. The documents are written to be read in order but can stand alone. IDs are consistent across all of them. In the documents, a reference such as "doc 05" means the document with that number in the table below.

Documents

#	Document	What it answers	Primary audience
01	Business Context and Growth Strategy	Why own-channel renewals are near zero; segment, channel, trust, value and data strategy; roadmap; KPI tree; illustrative business case	Executives, judges, steering committee
02	Functional Requirements Specification	What the platform must do: FR-001 – FR-110 by capability, with business rules, priority, track and build status	Product owners, BAs, engineering
03	Non-Functional Requirements	How well it must do it: NFR-001 – NFR-069 (performance, SLOs, security, privacy, accessibility, DR, configurability)	Architects, security, operations
04	User Stories and Acceptance Criteria	US-001 – US-077 in 15 epics, with Gherkin acceptance criteria linked to FRs	Delivery team, QA, UAT users
05	Requirements Traceability Matrix	FR → US → code → API → rule kind → test file, plus engineering notes E-01 – E-22	Engineering, QA, audit
06	Personas, Journey Maps and Service Blueprints	5 customer and 13 staff/partner personas; current and future journeys; service blueprints; pain points; moments of truth	Product, UX, campaign managers
07	Commercials and Engagement Model	Phases, team, effort, Options A and B, run cost, 3- and 5-year TCO, milestones, assumptions, exclusions	TASCO procurement and finance, executives

ID conventions

Prefix	Meaning	Defined in
SEG-n	Growth segment (lapsed, new vehicle, renewal, conquest, cross-sell, fleet, partner-led)	01 §4
K-nn	KPI	01 §11
A-nn	Business-case assumption	01 §13
R-nn	Strategic risk	01 §16
FR-nnn	Functional requirement	02
NFR-nnn	Non-functional requirement	03
W-n	Workload assumption	03 §0
EP-nn, US-nnn	Epic, user story	04

Prefix	Meaning	Defined in
E-nn	Engineering note (code inconsistency found during documentation, with resolution status)	05 §3
PC-n, PS-nn	Customer persona, staff/partner persona	06
PP-nn, MoT-nn	Pain point, moment of truth	06
C-nn	Commercial assumption	07 §9
T1-T4, NB, PL	Challenge tracks 1-4, new - business extension, platform/governance	02 §0

Sources and conventions

- **Facts about TASCO, VETC and the market** come only from the client brief. Everything else is a labelled assumption.
- **Facts about the solution** cite the codebase: `config/rules/*.json` (business rules), `config/security/rbac.json`, `src/domain`, `src/application`, `src/adapters/http/routes.js` (80 API routes, described in OpenAPI at `/api/openapi.json` and `docs/api/openapi.json`) and `src/bootstrap/seed.js`.
- **All financial figures are illustrative or indicative.** Unit costs come from `config/rules/costs.json` and regulated premiums from `config/rules/tariff.tnds_car.json` (Decree 67/2023/ND-CP, to be confirmed by TASCO underwriting); for example VND 480,700 incl. VAT for a car under 6 seats.
- **Regulatory references** (Law on Insurance Business 08/2022/QH15, PDP Law 91/2025/QH15, Decree 13/2023/ND-CP, Decree 91/2020/ND-CP) are noted for **confirmation by TASCO legal**. They are not legal advice.
- **Dates** are written as DD Month YYYY in prose; ISO dates (YYYY-MM-DD) appear only in API examples and code.
- **Vietnamese terms:** *Bảo hiểm TNDS bắt buộc* (compulsory motor third-party liability), *đăng kiểm* (vehicle inspection), *bảo hiểm vật chất xe* (physical damage, `MOTOR_PD`), *tai nạn người ngồi trên xe* (passenger accident, `PA_SEAT`).

Related documentation

Architecture, delivery, operations, quality, UX and user manuals are maintained in sibling folders under `docs/`, each with its own index (`00-index.pdf`), for example the [Solution Architecture](#) (`docs/architecture/solution-architecture.pdf`) and the [Test Strategy](#) (`docs/quality/test-strategy.pdf`). Test cases and the latest automated run are in the workbook `docs/quality/TASCO-Test-Cases-and-Results.xlsx`.
