Document	Version	Date	Owner	Status
RACI Matrix	1.0	07 October 2026	iorta TechNXT — Delivery Lead	Issued for submission

R = Responsible (does the work) · **A** = Accountable (owns the outcome, signs off; **exactly one per activity**) · **C** = Consulted (two-way, before the decision) · **I** = Informed (one-way, after the decision). Each activity lists the party codes for each letter. A party that is both accountable and responsible appears in both columns. A party that is not listed is not involved.

Parties and abbreviations

Org	Code	Party
TASCO Insurance	T-BUS	Business owner (sponsor, motor line head)

B6	DSAR handling — access export / erasure (/api/dsar/:id/*)	T-CMP	T-CMP	T-IT, T-DAT, V-PRD, V-APP, V-DAT, V-CC	T-PRD

#	Activity	Accountable (A)	Responsible (R)	Consulted (C)	Informed (I)
B7	Consent withdrawal and do-not-contact handling	T-CMP	T-DAT, V-APP, V-CC, I-EN, X-VAI, X-ZAL, X-SMS	T-PRD, V-PRD	—
B8	Data-quality triage and correction (/api/dq/*, expiry corrections)	T-DAT	V-DAT	T-PRD, V-CC, P	—
B9	Rule changes in BAU (author → simulate → approve)	T-CMP	T-PRD	T-DAT, V-PRD, V-CC, I-BA	T-BUS
B10	Access reviews (quarterly, roles from rbac.json)	T-SEC	T-IT	T-PRD, T-CMP, V-CC	—
B11	RBAC configuration changes (code review + CAB)	T-SEC	T-IT, I-EN, I-DSO	T-PRD, T-CMP, I-AR, I-QA	—
B12	Audit-chain verification and audit evidence for internal/external audit	T-CMP	T-CMP	T-IT, T-SEC	T-BUS
B13	Partner API key issue / revocation and suspension	T-PRD	P	T-CMP, T-SEC	T-IT
B14	Commission statement reconciliation and payment	T-PRD	P	T-BUS, T-CMP, T-IT	—
B15	Telesales operations (inbox, handoff SLAs)	V-CC	V-CC	T-BUS, T-PRD, V-PRD	T-CMP
B16	Claims FNOL acknowledgement (4-hour SLA)	T-PRD	T-PRD	T-BUS, T-IT, V-APP	T-CMP
B17	Knowledge transfer (see the Knowledge Transfer Plan)	T-IT	I-DL, I-AR, I-EN, I-QA, I-DSO, I-BA, I-UX	T-BUS, T-PRD, T-SEC, T-DAT, V-PRD, V-APP, V-DAT	T-CMP
B18	Platform roadmap and continuous improvement	T-BUS	T-PRD, V-PRD	T-CMP, T-IT, T-SEC, T-DAT, V-APP, V-DAT, V-CC, I-DL, I-AR, I-BA, I-UX, P	—

Notes on Part B:

- **B12:** T-CMP is accountable for producing the evidence. Internal Audit (outside this matrix) consumes it through the read-only `auditor` role.
- **B16:** the accountable party is the TASCO Claims Lead (a product/business function, shown under T-PRD). The claims team under that lead, holding the `claims_handler` role, carries out the work (R).
- **B15:** telesales operations are accountable and responsible within VETC's call centre, assuming VETC runs the telesales squads as agreed in Discovery. If TASCO runs telesales, A moves to T-PRD.

Key separation-of-duties rules reflected above

1. **The maker cannot be the checker.** The rules service rejects approval or rejection by the draft's author (Maker-checker: you cannot approve your own change). The role pairs `rule_author` + `rule_approver` and `rule_author` + `compliance_officer` cannot be held by the same person (enforced from `config/security/rbac.json`).

2. **Restricted rule kinds need Compliance.** `abac`, `copy_guard`, `contact_policy`, `commission` and `retention` can be approved only by a `compliance_officer`, which supports A8 and B9 (T-CMP accountable).
3. **The platform administrator cannot author or approve rules or see customer PII.** The `admin` role has `users:manage`, `ops:*`, `audit:read`, `rules:read` and `dashboard:read` only, and it cannot be combined with any business role. Administrators cannot change their own roles or status.
4. **Support engineers run jobs but cannot see dashboards, customers or rules** (`support_engineer:ops:read`, `ops:run_jobs`).
5. **Auditors are read-only** (`audit:read`, `rules:read`, `dashboard:read`).
6. **DSAR erasure** is limited to `compliance_officer` (`dsar:manage`). It is refused while a policy is active, because of the legal retention obligation.
7. **Staff never take payment.** Telesales send quotes to the customer's VETC app; only the customer can pay (supports B15 and the "never pay by phone" promise).
8. **RBAC changes** are code plus CAB, never a runtime toggle.

RACI maintenance

The Delivery Lead owns this document until BAU handover, and the TASCO IT Service Manager owns it afterwards. It is reviewed at every stage gate and whenever an organisation or role changes.
